

## PAR SPOT FOR LAMP MR16 LED

### PAR SPOT LED

The Par Spot e-CO16 is a compact Spot, using MR16 LED lamps that replace dichroic halogen lamps. With similar miniature design the spots used to illuminate stages in theaters and shows, emit concentrated lighting to highlight small areas or objects with bright light beams, keeping the lamp inside to avoid side reflections and distractions by the light source. Ideal for applications in stained glass windows, small product exhibitions, museums, art galleries.
